Improving Access to Basic Diabetes Care in Peru

2015 Fundraiser for WDF

Peru

WORLD **DIABETES** FOUNDATION

Land area:

494,208 sq mi (1,279,999 sq km)

Population (2014 est.):

30 million; birth rate: 18.57/1000; infant mortality rate: 20.21/1000; life expectancy: 73.23

Capital and largest city:

Lima, 9.13 million

Monetary unit: Nuevo sol (1991)

GDP: 202.3 \$ Bln (2013)

DAC list placement:

Upper Middle Income (per capita GNI \$3,976-\$12,275 in 2010)

Diabetes in Peru

WORLD **DIABETES** FOUNDATION

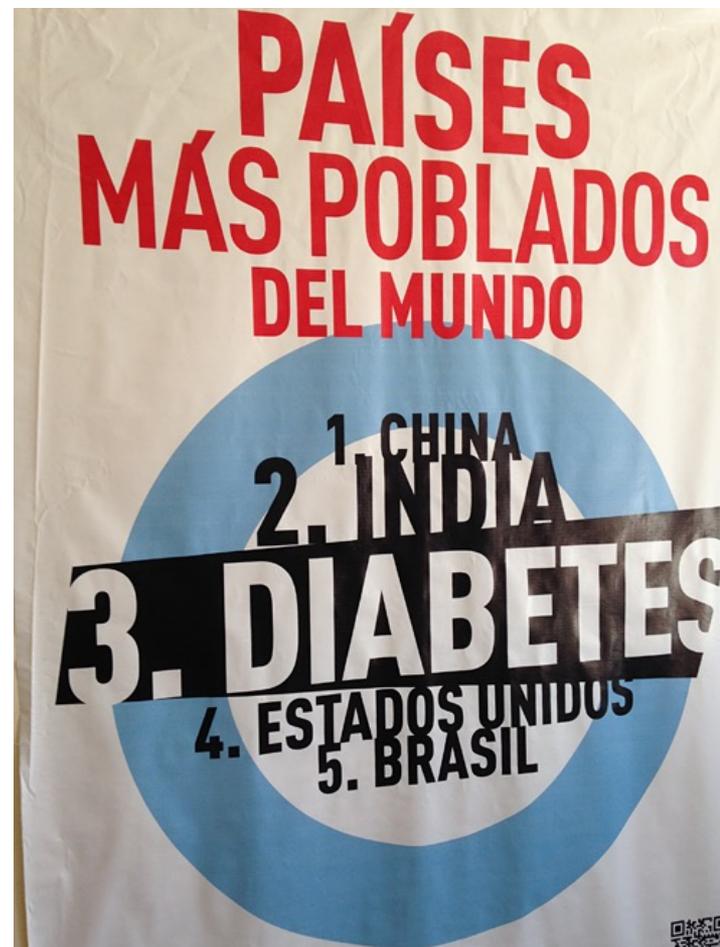

- Dramatic shifts in demography and lifestyle leading to fast-growing obesity rates
- Diabetes prevalence is estimated to be 7.2%
- The country is seeing an increasing number of severe diabetes-related complications
- Diabetes is addressed in the Peruvian Health Strategic Plan
- Available resources are very limited

Current WDF support to Peru

The WDF began working in Peru recently, and currently has two projects:

- 2010: A partnership with the Peruvian Diabetes Association (ADIPER) to improve access to care at the primary level, and raise awareness among patients and the general population.
- 2011: A partnership with the diabetes NGO APROVIDA to establish diabetic foot care and promote prevention of foot complications in two Northern coastal regions.

Fundraiser: better care, more awareness

WORLD **DIABETES** FOUNDATION

Goals:

- To raise awareness in Peru about type 2 diabetes and its prevention
- To improve diabetes care in Peru via training and establishment of clinics in two cities
- To prevent and treat foot complications

Close collaboration with MOH

WORLD **DIABETES** FOUNDATION

Approach

- WDF's partner, the Peruvian Diabetes Association (ADIPER), will collaborate with the Ministry of Health to enhance implementation and sustainability.
- The Ministry of Health will sponsor the physical premises for the clinics and salaries for qualified health care staff.
- WDF will fund the establishment of new clinics (equipment, renovation etc.)

Expected results

- **50 HCPs trained in general diabetes management and diabetic foot**
- **50 HCPs trained in diabetic foot care**
- **3000 people screened for diabetes**
- **2500 people counselled and treated for diabetes and diabetic foot**
- **2055 people provided with enhanced foot care services**
- **4 basic diabetes care clinics strengthened (2 in Lima, 2 in Piura)**
- **4 new diabetic foot care units established**
- **2 diabetes care annual feedback seminars conducted**
- **10,000 posters about diabetes prevention produced and distributed**
- **2 awareness meetings with the Health Minister and politicians held**

Thank you!
